

The storage bins C series are completely made of stainless steel and come in different sizes to allow the storage of granule material beside machines or centralized systems. Standard dimensions from 100 to 1700 liters. All models have wheels with brake, discharge slide gate, pipe for suction probe, grille for bags, cover.

On request: flange for connecting an automatic feeder, material level sensors, multi-way suction boxes and metal grid for bags.

Metal grid to support bag during emptying
